## TECHNICAL EXPERIENCES

### Academic Projects

- **DynOPool - Pooling Revisited: Your Receptive Field is Suboptimal** challenges conventional neural network design methodologies, introducing a novel pooling layer.
  - Focused on optimizing the network structure in a differentiable way to minimize inductive bias.
  - Resulted in a significant publication (detailed in the Publications section).
- **Implicit Neural Representation for Motion Deblur** employs spatially-variant motion deblur based on Implicit Neural Representation.
  - A spatially-variant deblurring network takes deformed features and their offsets as inputs.
  - It shows superior performance to the state-of-the-art methods on the restoration of downsampled and motion-blurred images.
  - *U.S. Patent Application Number: 17/973,809 (in progress)*
- **Model Stock: A Novel Weight Merging Method for Fine-tuning Pretrained Models** introduces a powerful approach to improve model performance by merging weights from different random seeds.
  - Unveils geometric patterns of fine-tuned models residing on a thin shell. Utilizing this discovery, we developed a novel weight merging method that markedly enhances model robustness and performance.
  - Provides new insights into weight merging, highlighting an underexplored area of model optimization.
  - Currently expanding this method to encompass weights fine-tuned under various configurations, broadening its applicability and potential impact.

### Personal Project

- **Dataset for COVID-19 (DS4C)**: Created the world’s 3rd most impactful COVID-19 dataset with fine-grained patient-level data and policy-level data [Kaggle]
  - The dataset is used by researchers from all over the world to study the impact of policies on COVID-19 spread..
  - Interview article about NeurIPS workshop paper with AITimes [Korean] [English (auto-translated)]

## INVITED TALKS

|   |                     |             |
|---|---------------------|-------------|
| <b>Korean Conference on Computer Vision</b> | <b>Seoul, Korea</b> | <b>2022</b> |
|---|---------------------|-------------|

- 20 minutes oral presentation (top 23.5% among published papers) on CVPR paper “Pooling Revisited: Your Receptive Field is Suboptimal” presented by prof. Bohyung Han

**Databricks Invited Talk** **San Francisco, U.S. (remote)** **2020**  
 • 1 hour talk on “The Complexities around COVID-19 Data” invited as DS4C team [link]

#### SCHOLARSHIPS & AWARD

|   |  |                    |
|---|--|--------------------|
| <b>Government Scholarship for Overseas Study</b>  | <b>Korea Government</b>                  | <b>2023 – 2024</b> |
| <ul style="list-style-type: none"> <li>• Awarded a prestigious scholarship intended for international Ph.D. programs, recognizing top 64 candidates across all majors in South Korea. (Note: Scholarship was not utilized due to non-admittance into the program.)</li> </ul> |  |                    |
| <b>OnDream Global Scholarship Award</b>   | <b>Hyundai Chung Mong-Koo Foundation</b> | <b>2022</b>        |
| <ul style="list-style-type: none"> <li>• Award Prize - around <i>USD 2,350</i></li> <li>• For the paper “Pooling Revisited: Your Receptive Field is Suboptimal” at CVPR 2022</li> </ul>   |  |                    |
| <b>OnDream Future Technology Scholarship</b>  | <b>Hyundai Chung Mong-Koo Foundation</b> | <b>2021 – 2022</b> |
| <ul style="list-style-type: none"> <li>• Covers full tuition &amp; financial support.</li> </ul>  |  |                    |
| <b>National Scholarship for Science and Engineering</b>   | <b>Korea Student Aid Foundation</b>      | <b>2015 – 2016</b> |
| <ul style="list-style-type: none"> <li>• Covers full tuition.</li> </ul>  |  |                    |

#### EMPLOYMENT

|  |  |                             |
|--|--|-----------------------------|
| <b>Research Engineer</b>   | <b>Samsung Adv. Institute of Tech, Korea</b> | <b>2024 January–Present</b> |
| <ul style="list-style-type: none"> <li>• Conducting advanced research in deep learning and fine-tuning techniques.</li> <li>• Serving as a research engineer focusing on AI research and development in the semiconductor domain.</li> </ul>   |  |                             |
| <b>Backbone Research Intern</b>  | <b>NAVER AI Cloud, Korea</b>                 | <b>2023 July–December</b>   |
| <ul style="list-style-type: none"> <li>• Conducted research on robust fine-tuning based on weight merging and proposed a novel method, “Model Stock.”</li> <li>• Advised by Dongyoon Han and Sangdoo Yun.</li> </ul>   |  |                             |
| <b>Research Scientist</b>  | <b>Mind’s Lab, Korea</b>                     | <b>2019</b>                 |
| <ul style="list-style-type: none"> <li>• Conducted low-level vision research, which included:               <ul style="list-style-type: none"> <li>– Weakly-supervised segmentation based on inpainting.</li> <li>– Colorization of grayscale images using spatially-adaptive denormalization.</li> </ul> </li> <li>• Engaged in a month-long project at Alberta Machine Intelligence Institute, Canada (May 2019).</li> <li>• This role was part of fulfilling South Korean mandatory military service duty.</li> </ul> |  |                             |
| <b>Software Engineer</b>   | <b>TNC Technology, Korea</b>                 | <b>2017–2018</b>            |
| <ul style="list-style-type: none"> <li>• Developed a Java-based payment gateway server for the company’s clients.</li> <li>• This role was part of fulfilling South Korean mandatory military service duty.</li> </ul>   |  |                             |

#### TEACHING EXPERIENCES

- Teaching Assistant for *430.329: Introduction to Algorithms* at Seoul National University (Fall 2020)
- Teaching Assistant for *Samsung AI Expert Course* at Seoul National University (July 2019)
- Teaching Assistant for *Hyundai Motors AI Expert Course* at Seoul National University (Jan 2019)

#### EXTRACURRICULAR ACTIVITIES

- NeurIPS 2022, 2023 reviewer, CVPR 2023 reviewer
- Deepest: Seoul National University’s AI club (2019 – 2020)
